

VACCINATION INFORMATION

Patient TIPS for Living with Kidney Disease

Your kidney team recommends all patients with chronic kidney disease, have their Flu and Pneumonia vaccines. Enclosed are some Ministry of Health information sheets on Influenza and Pneumonia vaccinations.

We recommend you see your doctor for the following:

- **Annual Influenza (Flu) Vaccination** (usually available in November).
- **Pneumococcal (Pneumonia) Vaccination**

Keep a record of your annual vaccinations and let your family doctor and kidney team know when you've had them. If you require the Hepatitis vaccination, the clinic nurse will arrange this.

If you have any further questions regarding any of this information please contact your kidney team.
