Promoting wellness. Ensuring care.

What We Do: We provide spine and spinal cord related services under one roof to better serve patients in a more convenient setting.

The following outpatient services and clinics are available:

Spine Services:

- Spine medical and surgical assessments
- Pain management
- X-ray

Rehabilitation Services:

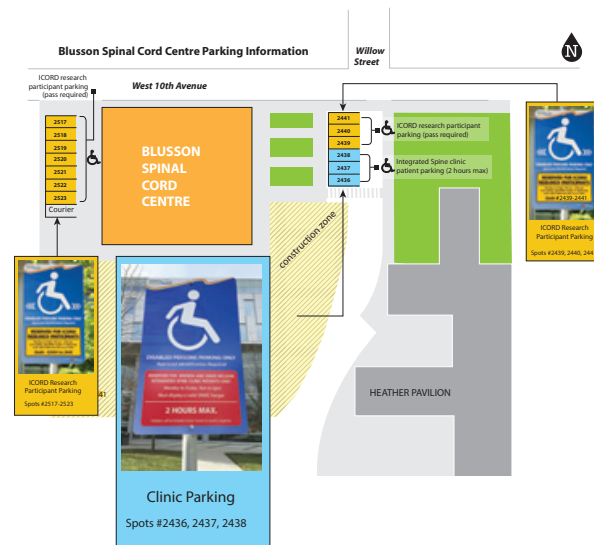

- Physiatry (rehab medicine)
- Urology
- Sperm retrieval and sexual health rehab
- Wound Care
- Autonomic assessments

Research

Research is an integral part of the clinical practice and delivery of care provided by the McLean Integrated

Spine Clinic. Ongoing projects, such as the Rick Hansen Spinal Cord Injury (SCI) Registry and the Canadian Spine Society Registry, help us better understand traumatic SCI and other spine conditions, with the goal of improving patient care and quality of life.

Parking

If you are driving to the BSCC for a clinic visit to the Brenda & David McLean Integrated Spine Clinic, there are 3 designated parking spots available for the clinic shown in blue on the map. A valid SPARC pass is mandatory to use these spots. If there are no spots available, more parking can be found in one of the nearby parkades.

ICORD research spots are ONLY for individuals who are volunteering their time for active research with ICORD at BSCC. Vehicles parked here without both SPARC and ICORD parking passes are liable to be ticketed.
